Education

K S Institute of Technology:	2022-2026
• BE in Computer Science and Engineering • Current CGPA: 8.96/10	
BASE PU College:	2020-2022
• Pre University Course • Percentage scored: 80.83%	
Sudarshan Vidya Mandir School	2010-2020

Experience

Software development intern Mphasis	Feb 2026 - Present
• Developed Java-based backend systems using JDBC, Hibernate, and DAO architecture. • Building RESTful applications with Spring, Spring MVC, and Spring Boot. • Working with JSP, JSTL, custom tags, events, and listeners for dynamic web modules. • Integrating Swagger for API documentation while continuously improving scalable application design.	

Projects

AI.D Node.js, Express.js, HTML, CSS, JavaScript, MySQL, AWS. Link	2024
• Developed a cloud-based medical history management enabling secure storage and access of 100+ records. • Implemented JWT-based authentication, password hashing, and query handling to prevent SQL injection. • Designed a user-friendly web interface to simplify medical data handling. • Integrated AWS RDS for structured data management and AWS S3 for image storage.	
GAME TESTING & BUG ANALYSIS Game testing, Debugging, System Analysis	2025
• Identified gameplay exploits and balance issues in multiplayer and progression systems • Reproduced input-based vulnerabilities affecting progression speed and fairness • Analyzed mechanics for damage scaling, economy inconsistencies, and state glitches • Performed testing across different environments including Linux-based systems	
HOME SERVER Linux, Raspberry pi, Samba, Jellyfin, Tailscale, SSH. Link	2025
• Built a home server running in raspberry pi that can be accessed at home and as well as any location. • Developed a home cloud storage for personal file and folder transfer using samba. • Built a media streaming server for streaming videos, movies, tv series using jellyfin. • Implemented tailscale to access the storage and media streaming setup to be accessed from any location.	

Technical Skills

Languages: Advanced Java, SQL, C/C++, HTML/CSS, JavaScript.

Frameworks: React.js, Node.js, Flask, PyMu.

DevOps and cloud tools: Linux, Git, AWS, IntelliJ, SQL Workbench, PyCharm.
